ERRATA DECLARATION

MetTel has determined that an improperly coordinated change was made in the database table where the data for EDI and GUI Restorals was combined to calculate the interval between an account being Suspended for Non Payment (SNP) and that account being Restored. This field definition change resulted in some erroneous and extraneous data being posted.

The accompanying chart reflects the elimination of the extraneous data and correction of the balance. It also discounts those PONs that show usage derived from Verizon's practice of restoring accounts prior to taking them as "winbacks".

While MetTel believes that practice is, in and of itself an anticompetitive activity, as this unbillable (and certainly uncollectable) usage should not be charged to the CLEC, MetTel is modifying its earlier submissions to exclude those instances where usage appears as a direct result of a "winback".

This revision affects paragraph 8.C. of Elliot M. Goldberg's Declaration of April 8, 2002, is modified to change 30.58% to 4.4%, 6.8% is changed to 7.6% and 37.38% is changed to 7.6%.

Section III Paragraph C. of MetTel's Supplemental Brief of April 8, is modified to change 30.58% to 4.40% and 30% is changed to 12%. Attachment 7 is replaced by the enclosed Attachment 7.A.

Due to this revision, OSS Issues Chart 9A replaces OSS Issues Chart 9 in MetTel's Ex Parte of April 15, 2002 and Exhibits C.A., F.A. and H.A. replace Exhibits C, F and H in MetTel's Reply Filings of April 19, 2002.
